An important update for Dentists, Hygienists, Assistants, and Front Office staff

Spokane County

Winter Session - 2022

WISHA/INFECTION CONTROL - HIPAA and BLS/CPR/1st Aid in the Dental Setting

“WISHA and DQAC’s Infection Control Rules - 2022”

From patient screening to social distancing, masks, and COVID scares; from N95 respirators, vaccinations, new infection control rules, waterline testing, and new sterilizing requirements, it's difficult - just to be able to stay safe and do your job - to know what WISHA and DQAC now require and what they don't. This class will present the continuing standards, the new rules, regulatory changes, and how to cope with all three.

HIPAA - 2022: “Protecting Your patients, Your Practice, and You”

The HIPAA folks are serious. Next to providing your patients the best possible dental care, protecting their personal, private, and often sensitive information is your job. Understanding your responsibilities means playing by the HIPAA rules and understanding the Privacy and Security requirements. From passwords and encryption to hacking, ransomware, and breach response, this class will walk you through the maze and help you understand how to protect your patients' PHI and yourself in doing so.

Basic Life Support - 2022 Certification

Attendees will certify in BLS and Basic 1st Aid.

DQAC Requires: Licensed Dentists, Hygienists, E.F.D.A., and Registered Dental Assistants to hold a current BLS certification. **WISHA Requires:** At least one staff person to be “adequately trained” to render first aid. This class does both.

Instructor, Dan Wells, Sr. Vice President of Program Operations at HARRIS BIOMEDICAL, has lectured on regulatory compliance, health and safety, OSHA, WISHA, Infection Control, and BLS/CPR for healthcare providers throughout the country. His knowledge, expertise, and unique presentation skills are among the best in dental industry.
